

# Office Furniture System

## MOTION TABLE

## Story

Medical research has highlighted that we should spend at least 40% of our time standing at work. Whilst standing all day can lead to back, knee or foot problems, remaining in a sitting position for more than 2 hours at a time significantly increases health risks. It has been suggested that regularly standing up at work has a number of health benefits including reduced risk of obesity, reduced risk of type 2 diabetes, reduced risk of cardiovascular disease and a reduced risk of cancer.

SOS Motion Table range integrates the adjustment mechanisms seamlessly into the desk frame giving a clean and less mechanical appearance. SOS products can also be installed as single desks or clustered workstations. This improves the efficiency of the structure as well as providing users with the means to configure and arrange workstations to suit their interior space.

## Aim

- Employee Health: To offer a Sit-Stand product range that provides measurable benefits for long term employee health.
- Cost effective: The reality that organizations face today is one of limited resources for a future of limitless change. SOS is committed to providing the best solutions at the best value.

## Structure

The structure provides support for work-surfaces, screens, wire management and storage. Many of the components are shared with a complimentary fixed height bench system.

## Screens

Light-weight screens are finished with fabrics available in a wide range of colours

## Motors

The electric height adjustment system is very quiet and is concealed under the table inside the leg structure.

## Features

### Flexibility

- The days of desks that are difficult to adjust are over. Our Motion table is operated by the simple press of a button. Included in the adjustment system is an option to pre-set your desired height.
- With this system, you and your employees can shift from sitting to standing in a matter of seconds.

### Functionality

- A small number of elements can be combined to create a wide range of office types
- Height Adjustment: The height adjustment feature is available in different versions-electric motor (sit-stand), crank-operated or manual locking style
- Additional elements such as technical beams, various screens, CPU holders and other accessories can be used to create individual style workspaces

Adaptability

The Motion Table creates a flexible open environment; easily configurable for different mobility, space efficiency, and collaboration requirements of each workgroup.

Part no: OM-MA  
2 Legs 2 stages

Part no: OM-02-S-T  
2 Legs 1 motor 2 stages

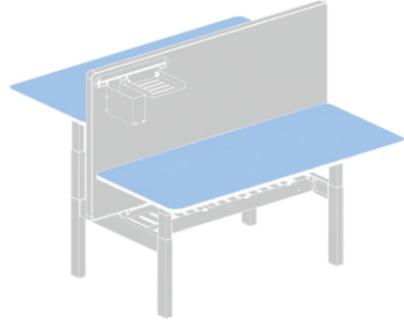

Part no: OM-03-T-R  
2 Legs 3 motor 3 stages
